

ivanti

Don't let a slow-performing web browser limit the productivity of your mobile workers. With Ivanti, you gain a secure enterprise browser designed for mobile operating systems. Unlike web browsers that were designed for desktops, then forced to fit into mobile operating systems, Ivanti offers a true enterprise mobile-oriented experience, including the speed and rapid-development capabilities you depend on. Now you can build powerful, productivity-enabling applications, easily incorporating data capture technologies such as barcode scanning, while delivering performance that allows mobile workers to get more done, faster.

Mobile apps that work faster

Desktop browsers suffer from slow responsiveness and screen rendering when placed onto mobile devices. Ivanti enables your workers to navigate task workflows faster than traditional browser-based applications—thanks to faster, middleware-based application rendering.

Develop data capture applications easily

Data capture technologies like barcode scanning and RFID can be added to applications in less time, and without the need for specialized coding knowledge. With Ivanti, there is no need to install a “data-wedge” to use or configure barcode-scanning devices.

Start right where you left off

Workers don't have to re-start applications or re-enter data when a mobile device shuts off, loses connectivity, or even loses battery power. Ivanti enables session persistence that brings workers right to where they can resume their work, and allows them to toggle between sessions.

Compatible with your host system

Modifying your host application to enable mobility isn't necessary. Ivanti enables client-side mobilization of all leading Supply Chain Management software, including Manhattan, Oracle WMS, High Jump, Descartes, SAP, JDA, Red Prairie, and more.

Implement functionality that allows workers to do more

Enhance the user interface and improve application formatting of host applications with CSS injections, or use JavaScript injections to extend the capabilities of the mobile app.

Ensure productivity with lockdown capability

Keep your workers focused on the task at hand by preventing access to undesired applications. Hide web addresses as well as navigation and start bars.

Device-tailored user experience

Take full advantage of the features offered in your chosen mobile device with device-specific Ivanti clients.

About Ivanti

Ivanti accelerates mobile productivity with solutions that enable supply chain operations. Global organizations across industries such as manufacturing, retail, warehousing, and field force automation rely on Ivanti enterprise mobility management, host-connectivity applications, and voice-enablement solutions to connect mobile devices to supply chain management systems. Ivanti products help ensure worker productivity in mission-critical mobile deployments, resulting in reduced costs that can contribute directly to operating margin. Visit www.Ivanti.com.
