

# Windows 10 is here. Are you ready?

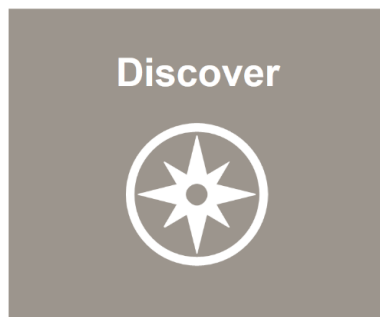

Ready to leave Windows 7 behind? You'd better be—because the clock is ticking to migrate users to Windows 10, with a new release cadence that forces IT into a constant state of migration.

## Your Windows 10 End-User Migration Challenges

- Replace, re-image, or upgrade devices?
- End-user downtime and productivity loss during migration
- Application compatibility issues
- End-user downtime and productivity loss post-migration while learning the new interface

## Simplify Windows 10 Migration with Ivanti

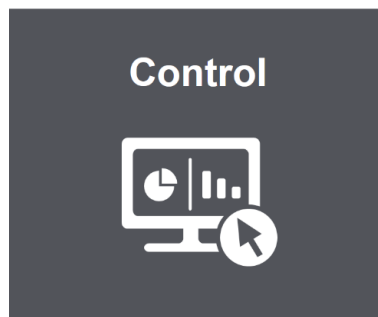

You can ease your migration challenges. By managing users' profiles, apps, and data separately from the operating system, migration—and user roaming—becomes effortless. Here's how.

### Discover

Find desktops, applications, and user file data

- Discover desktops and assess readiness for Win 10
- Discover user-file data locations
- Discover application usage and check compatibility

### Control

Gather settings and files with zero user downtime

- Deploy agents centrally
- Capture files and settings while the user works
- No downtime, even for hard-to-capture PST files

### Take Action

Centrally upgrade endpoints; get users live immediately

- Re-image or in-place upgrades
- Users get settings and files at first logon
- Track progress and audit success

Are YOU ready to make the jump to Windows 10?

Ease the journey with Ivanti
