## to Improve Operational Performance with Ivanti Reporting and Analytics

### Speed operations

- Make real-time adjustments to your supply chain operations
- Drill into data, perform root-cause analysis to reduce future downtime

### Process orders accurately

- Visualize multiple data sources to identify vulnerabilities
- Get alerts about shipments at risk from offline scanners

### Optimize workforce utilization

- Analyze financial impact of work flows and reduce cost of picking
- Share real-time views across sites of available devices and staff

Whether you're aiming to compress order cycle times, improve lines picked per hour or redeploy underutilized staff, reporting and analytics from Ivanti can help you to obtain insights on all of your data to drive immediate value.
