

**Solutions for Mobile Access to Web Applications:**

# Browser Solutions

It's no secret that web browsers can be powerful tools. But when productivity matters, you want to be sure that workers are using browsers solely for their work tasks, not recreation. Our browser solutions "lock in" that productivity focus, and also make it easy to integrate advanced data-capture technologies.

Enhance the capabilities of Pocket Internet Explorer with Ivanti® Industrial Browser, powered by Wavelink. And what about a high-powered browser for your SAP ITS Mobile systems? CETerm, powered by Naurtech, is the answer. You can even introduce a secure enterprise browser using VelocityCE. We've got the mobility extensions for your web-based enterprise systems covered. And when you're ready to transition to Android, iOS and Windows 10 mobile computers, our Velocity framework helps you move your existing web apps to the latest devices quickly and easily.

General Browser Features	WIB	CETerm	VelocityCE	Velocity
Supports Microsoft Windows Mobile/ Windows CE operating system	✓	✓	✓	✗
Supports Android operating system	✗	✗	✗	✓
Supports iOS operating system	✗	✗	✗	✓
