ivanti | Wavelink

Deliver a powerful, productivity-boosting mobile experience for your SAP, Oracle, or other web-based enterprise systems. Velocity is the framework to bring your existing web apps to Android, with all the tools to help workers speed through retail and supply chain tasks.

Meet the Demand for Faster Delivery

Empower your task workers to pick faster and meet customer expectations by providing 'same day' delivery.

Increase perfect order rate

Order accuracy is a metric that never goes out of style. Companies look to intuitive apps as a means to boost accurate data entry.

Reduce labor costs

Reduced training times, accelerated task completion, and more contribute to a more productive workforce and boost operating margins.

Ivanti Velocity has you covered with Android Migration Plan

Ivanti Velocity delivers your framework for Android migration. Whether you're currently running telnet or web apps, we've got you covered.
