Ivanti Unified IT Enterprise License Agreement

The Ivanti® Enterprise License Agreement (ELA) is an innovative licensing vehicle for enterprise customers. Now organizations can take advantage of Ivanti's full portfolio to unify their IT and deploy solutions that match their business initiatives—without spinning up a new procurement cycle or worrying about where to find budget for each initiative.

Buying Lifecycle Concerns

Compliance

Budget

Maintenance

Vendors

ROI

Minimize Vendor Fatigue with the Right Partner

Leveraging multiple vendors means you must cope with different buying processes, maintenance programs, support methods, and licensing agreements—each with its own compliance issues. You can give in and let vendors rule your life. Or, you can team up with a partner that helps you be strategic about your IT while saving you time and money.

Relax a Little—The Rules Are in Your Favor

You know about true-ups—they're a pain, right? What if you were automatically licensed for 20 percent more than what you're paying for? We call it "True-Forward." This means at the end of each year we reset your license count to your new amount without any back-charges—unless, of course, you go well beyond your added 20 percent. True-Forward would certainly reduce a lot of licensing headaches, wouldn't it?

Revel in Your Discounts

You have two choices of ELA: either a *Pick 2* or the whole *Unified IT*, which includes all the primary solutions from five product families.
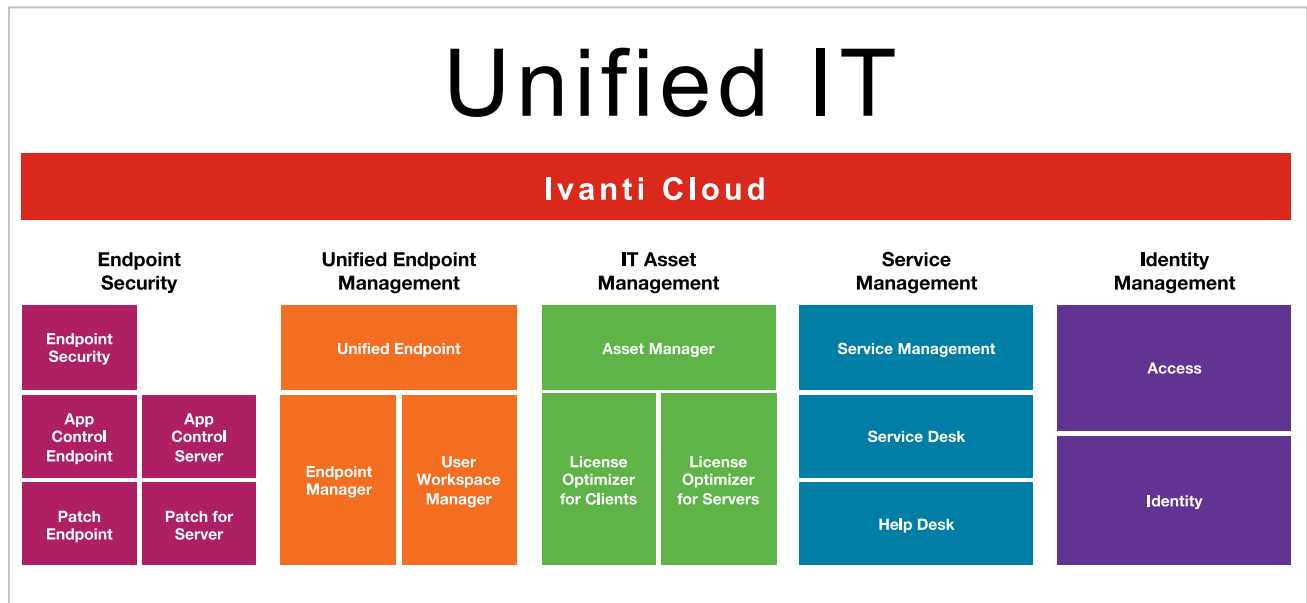

- **Unified IT:** Get all five of the Ivanti product families for a significant savings. The ELA starts at 500 users; however, additional discounts apply at higher user volumes of 5,000, 10,000, and beyond.

- **Pick 2:** Choose any two product families and you get all the primary products within those families.

Gain Ivanti Cloud and Greater Visibility

The ELA also provides additional products and functionality not included with each Ivanti product.

- **Ivanti Cloud:** Includes all core cloud services from Ivanti Cloud including real-time capabilities, Smart Advisors, data services, and automation.

- **Xtraction Dashboards:** Choose a Pick 2 ELA and get the enterprise server, additional analysts, and unlimited viewers. Choose the Unified IT ELA and receive 10 additional connectors to popular third-party vendor data.

ELA Details at a Glance

Unified IT

Pick and Choose to Solve Business Challenges

Once your initiatives get the green light, go for it! You have what's needed to make it happen with the Unified IT ELA. You'll also find most projects will get the green light faster, because there won't be the same budgeting issues. Here are a few solutions that leverage the financial benefits of the ELA:

1. **Onboarding and Offboarding** (Unified IT) – Automated provisioning and de-provisioning of devices, security rights, and services.

2. **Self-Service IT** (Unified IT) – All services, knowledge, software, and more available through an end-user portal.

3. **Unified IT Dashboards** (Unified IT) – Dashboards connected to all Ivanti and top non-Ivanti vendor data.

4. **Automated Isolation and Remediation** (Unified IT) – Accelerated security-incident resolution.

5. **Windows 10 Migration and Rollout Updates (**Pick 2) – Migrate to and manage the rapid cadence of updates.
