

University IT Service Management Checklist

When modernising your IT infrastructure, it's important to ensure your new IT Service Management (ITSM) solution can adapt to your Universities requirements.

7 Essential Requirements Modern ITSM Solutions Should Meet:

Automated and pre-configured workflows

Support for context-based IT and non-IT-related service requirements

Scalable cloud and on-premises deployment options, accessible anywhere via browser

Options for named and concurrent user licensing – Subscription or Perpetual

Configuration and upgrade processes that are flexible and easy to perform

Options for technology expansion, such as voice automation and AI-powered chatbots

Integration points and connectors for various operational systems

Modern Service Management for Your University

With Ivanti Service Manager, uni's benefit from innovation while realising cost advantage – hitting targets for budget and productivity.
