

# Supercharge Your IT Service Management

Supercharge your IT service management and move to a modern, automated solution with innovations designed to help you do more. Here are **SIX** reasons why you should upgrade to Ivanti Service Manager.

## A 1:1 License Swap

Get the same number of seats you have with Ivanti Service Desk (formerly Landesk Service Desk) at no additional cost.

## Superior Service Catalog

Enable your users with ready-to-go content, workflows for IT, along with a shopping cart for self-service options.

## Add-on for Integrated Voice Automation

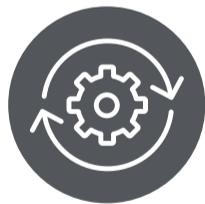

Dramatically reduce your inbound and outbound call load and improve the experience with automated workflows, more self-service options, pre-populated caller info and screen pops.

## AI-Powered Hub and Bot

With cloud deployments, the Hub and Bot will allow users to make requests or log incidents just by having a simple conversation with your new virtual support agent. No more forms for simple requests or agents having to resolve common incidents.

## Third-Party Integrations and Automation

Tools like Ivanti Automation and our Zapier connector make it even easier to extend your workflows to the rest of your infrastructure and to cloud services like Slack, Twitter, Trello and more.

## Unified IT capabilities from the Ivanti Cloud

Add Ivanti Cloud to Ivanti Service Manager for enhanced analytics and real-time insights that span your landscape. You'll benefit from expert recommendations, increased visibility and data, and more automated end-to-end processes.

Worry less about the small stuff and get more time to focus on the business-critical tasks on your to-do list.
