How Much **Data** Are You **Dealing With?**

It's one thing to find needed data quickly, but you must also know what you're looking at, what you can do with it, and be able to act on it quickly.
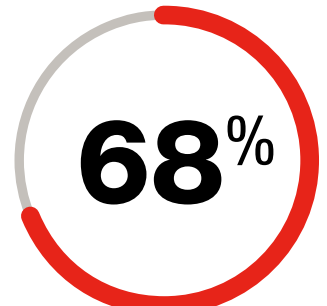

15%
have way too much data

31%
deal with 25 or more sources of data

50%
say it can take days, weeks, or longer to get actionable data recommendations

68%
aren't confident they have the resources to make their data actionable

The Dangers of Siloed Data

Sorting through mountains of data to find any kind of intelligence to help you do your job better is a monumental task. You need something to help quickly gather and sort through all your data sources to reveal specific recommendations for your business.

Introducing Ivanti Cloud:

- Ask a question about your IT environment and get an immediate answer?
- Receive an interpretation of your data, time-saving recommendations for what to do next, and strategic insights that get you ahead?
- Take immediate action – or automate actions from within the same console. For example:
  - Drill down into anomalies and discover root cause
  - Reset encryption or firewall
  - Kill a process
  - Troubleshoot and kill greedy or unruly processes
  - Generate a ticket
  - Discover and reconcile all purchased devices to bring them into the fold

Turn your data into actionable insights with Ivanti Cloud. Schedule a free and fast demo with an Ivanti team member in your region!
