

Supply Chain

Android Enterprise

Select, deploy, and manage Android rugged mobile computers easily with Ivanti Avalanche, powered by Wavelink.

Fast App Updates

Update all workers' devices during a scheduled break – even remotely, in as little as 10 minutes

Align Access to Hubs

Enable managed Google Play store accounts for users, while offering an enterprise application hub for company-owned devices

Secure Work Content

Enable corporate apps on personal devices, while maintaining control of user access and policies

Full Device Control

All the device management you expect for deploying corporate-owned mobile devices, app delivery and more

Enforce Kiosk-mode

Dedicated device mode locks devices into only the worker- or customer-facing app you want them to see

Flexible Security Modes

Enforce different policies with each Android Enterprise mode, optimizing control across your mobile deployment

Avalanche is your trusted enterprise mobility management (EMM) solution, ready for Android.
