Advanced HTML5 Secure Remote Access

Completely clientless, browser-based, secure remote access solution using advanced HTML5; fully integrated with Pulse Connect Secure VPN solution. Accelerate performance and simplify access to secure remote desktops.

Access from any device and anywhere

Pulse Connect Secure (PCS) Advanced HTML5 solution enables customers to access remote desktops or stream applications from any device with an HTML5-compatible browser. The solution works with every browser and does not require a VPN client. Access your VMs, desktops, servers, or applications anytime and from anywhere.

Secure access from unmanaged devices

Access corporate network resources from unmanaged devices without requiring any clients nor compromising security. Endpoint posture is validated prior to giving access.

Accelerate scalability and performance

As a fully integrated capability in PCS, this solution helps increase scalability and triples performance over existing secure remote access solutions.

Pre-existing security settings remain intact

The access from the client to the enterprise takes place via only one, freely selectable port (SSL, like online banking). No further ports must be opened. Pre-existing security settings are simply adopted, while security measures (e.g. two-factor authentication, etc.) stay intact.

Works with any browser

Any device with a common browser can be used as a client. For example, it would be possible to display the desktop of a Windows 10 PC in the browser of a Bring-Your-Own-Device (BYOD) solution such as an iPad or an Android tablet.

Flexible and granular access policies

Create granular access policies based on the end-user profile and settings; seamless SSO access to remote desktops.

This table provides a quick overview of the leading features and capabilities for specific browsers.

Feature/Option	HOB	Basic HTML5	Advanced HTML5
Single Sign On		✓	✓
Screen Settings	✓	✓	✓
Disable Audio	✓	✓	✓
Enable Printing	✓	✓	✓
Enable Audio on Console Session		✓	✓
Enable Audio Recording		✓	✓
