

Accelerate Your App Release Pipeline

Key Pain Points

- Numerous pipelines with complex stakeholder interactions
- Time intensive with long lead times
- Complex and conflicting requirements
- Unregulated and unmanaged app portfolio

Benefits

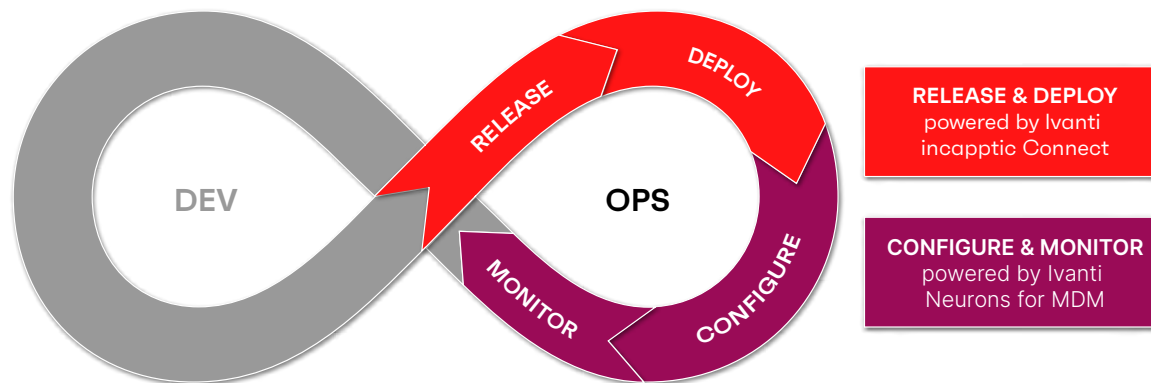

- Integrate and centralize all pipelines
- Reduce release time to two minutes
- incapptic Connect complies with industry best practices
- Enterprise-level overview of portfolio
- Automatic code signing, provisioning profile updates and metadata appraisal

At a glance

Mobile applications have changed the face of industry. Companies can leverage hundreds of mobile apps to power their key business processes, all of which require constant updates and bug fixes. At scale, the current manual processes for releasing app updates are a key weak point.

Ivanti incapptic Connect simplifies, secures and automates the app release process, allowing business units to focus on changing user needs and creating innovative new apps rather than performing tedious metadata management.

App Release automation with Ivanti

Key Features

- Self-service portal: Access Ivanti incappptic Connect with a standard web browser.
- Designate different roles and permissions levels.
- Self-service app submission: Upload apps, review technical specifications, check for duplicate file uploads and confirm correct file types.
- CI integration: Upload apps from continuous integration tool chains, i.e., Jenkins.
- Metadata validation: The platform automatically proofs metadata for the correct form of text, image and video before publishing.
- Automatic app aligning: All apps are signed using the latest signing assets. iOS apps can be automatically updated each time they are signed.
- Submission approval: App Owners can approve apps and metadata assets.
- Automatic publishing: Once signed each app update can be automatically published to Ivanti Core.
- Automatically generate Apple Push Notification service (APNs) certificates.
- Expiration notifications: App expiration and push notification certificate expiration are continuously monitored and reported.
- App directory: Provides an enterprise-level overview of all active applications.
- Knowledge base: Publishing team can upload files and provide developers with data assets and guidelines.

Ivanti incappptic Connect integrates with Ivanti Neurons for MDM app store to provide a complete app release pipeline solution to enterprise customers. Updates, bug fixes and new applications can be easily deployed to the Ivanti platform in a few clicks. Companies retain complete control over their certificate distribution and can allow external developers access to the platform without having to hand out access to core business systems.

Success Story

Ivanti incappptic Connect has been implemented by CLAAS to manage their fleet of 3000+ mobile devices. CLAAS has deployed a portfolio of 50+ mobile applications across key business operations, requiring weekly app updates across the portfolio. **With Ivanti incappptic Connect**, CLAAS was able to reduce time spent on updates 2-3 hours per app, per update, making it easy to maintain an innovative, dynamic and secure app portfolio.

- 3,000+ mobile devices
- 50+ mobile applications
- Hundreds of employee hours saved
