

# Secure Operational Technologies

From manufacturing to retail, logistics to healthcare, supply-chain operations teams depend on elevated cybersecurity to complement mobile device management (MDM). The includes regulatory compliance around the world – including the EU Medical Device Regulation (EU MDR), compliance with CISA mandates and executive orders in the United States, or the “Essential Eight” provisions of the Australian Signals Directorate.

With Ivanti Neurons for MDM, you’re able to account for all mobile devices in your operations to ensure patches are installed, configuration and policy settings are in – place and devices are ready for business.

### Zero-trust cloud solution

Multiple geographic hosting locations keep your data local.

### Zebra LifeGuard integration

Simplified patch management for apps and operating systems, delivered through Neurons for MDM.

### Share devices

Support kiosk mode and fully managed device mode for multi-shift use cases.

### Integrated remediation

Proactive remote control, detection and resolution of issues between shifts.

### Mobile Threat Detection

Option to add real-time cybersecurity protection against zero-day threats.

### Save time

Bulk onboarding and fast provisioning to automate app, configuration and security policy deployment.

### Save money

Simplified staging so users can take a device out of the box and begin working.

### Monitor compliance

Android Enterprise Recommended solution helping businesses around the globe meet local mandates.

## Elevate Cyber Risk Management for Global Operations

Improve your security posture across supply-chain business operations and help support compliance with local regulations. Ivanti Neurons for MDM is built on mobility standards, making it easy to see and manage multinational rugged and traditional mobile device deployments, with enhanced security for supply-chain, healthcare and other vertical operations.
