

Operations Teams Are Open to Automation

Supply chain operations welcome emerging technologies. Our latest research indicates both workers and managers see automation – including autonomous mobile robots (AMRs) – contributing to operational excellence.

94%

of workers see automation, artificial intelligence and AMRs as helpful tools to be more productive and efficient.

88%

of workers are motivated by incentives, with nearly one-in-three identifying bonus pay accelerators the top-rated incentive.

39%

of managers recognize leading technologies play a key role in attracting and retaining top talent.

How should your team optimize your operational tech stack? The insights you need are available now in our 2024 edition of the **Supply Chain & Warehouse Trends** report.
