Ivanti's Capabilities to Support the Mission of the Department of Defense (DoD)

Executive Summary

Ivanti is committed to supporting the mission of the Department of Defense (DoD) by providing innovative solutions that enhance the digital presence and operational capabilities of U.S. warfighters. Our solutions are designed to securely support on-premises, disconnected and air-gapped environments, and Ivanti is committed to providing a DoD Impact Level 5 cloud environment. Today, Ivanti's solutions are deployed in programs across every branch of the DoD. Ivanti is at the vanguard of supporting mobility, discovery, asset, and patch management, and ensuring interoperability with other solutions on the DoD network and with our trusted allies. Ivanti is also a leader in Secure by Design software, emphasizing security and trust in all our offerings.

Ivanti's differentiators

Ivanti's solutions offer several key differentiators that make us uniquely positioned to support the DoD's mission.

- Secure support for disconnected and air-gapped solutions. Ivanti provides robust solutions for environments where connectivity is limited or non-existent, ensuring that critical communications and operations can continue without interruption. Ivanti solutions are modernized, intuitive, and comprehensive, allowing DoD workers and VIPs to utilize secure mobile solutions including email, apps and secure Ivanti Assured Identity.

- Supporting any user from anywhere. Ivanti enables many DoD use cases, including knowledge workers, VIPs, frontline workers, kiosks, and tactical warfighters. Certificate-based workflows and SSO are differentiators, and with Ivanti's PIV-D solution DoD workers can log in to any CAC-enabled service on mobile devices from anywhere.

- Support for 5G. Our solutions are designed to leverage the capabilities of 5G technology, providing faster and more reliable communication for U.S. warfighters.

- IT service management (ITSM). Ivanti's ITSM solutions streamline and automate IT processes, improving efficiency and reducing downtime.

- Attack surface management. We offer comprehensive attack surface management solutions that provide real-time visibility and control over potential vulnerabilities.

- Vulnerability management. Ivanti enables frictionless integration with mobile threat defense (MTD) to protect against device, network, and application vulnerabilities, and Ivanti's risk-based vulnerability management solutions prioritize and remediate vulnerabilities on connected devices, reducing the risk of cyber threats.

- IT asset discovery and management. Our solutions provide complete visibility and control over IT assets, ensuring that all assets are accounted for and properly managed.

- Interoperability. Ivanti's solutions are designed to be interoperable with other solutions on the DoD network and with trusted allies, ensuring seamless integration and collaboration.

Vision for modernizing and mobilizing U.S. warfighters

Ivanti's vision for modernizing and mobilizing U.S. warfighters is centered around providing secure, scalable and innovative solutions that enhance operational capabilities and support the dynamic requirements of modern warfare. Our approach includes:

- Agile and scalable infrastructure. Ivanti's solutions are designed to be agile and scalable, capable of adapting to changing mission demands and leveraging the latest technologies.

- Outcome-focused approach. We prioritize delivering solutions that are aligned with user needs and that contribute to overall mission success.

- Secure by design. Ivanti emphasizes security in all aspects of our solutions, from network infrastructure to applications and data, ensuring that U.S. warfighters can operate with confidence in any environment.

Support for DISA's DoD Mobility Unclassified Capability (DMUC)

Ivanti supports DISA's DoD Mobility Unclassified Capability (DMUC) by providing secure and compliant solutions that meet the stringent requirements of these programs. In addition to our current

government-approved offering, we will be offering an optional IL5 cloud capability, ensuring secure and efficient mobile enterprise operations. This includes support for APS, PIV and other specific requirements.

Support for ATAK (Android Team Awareness Kit)

Ivanti supports the Android Team Awareness Kit (ATAK) by providing secure and reliable solutions that enhance situational awareness and operational effectiveness for U.S. warfighters. Our solutions ensure that ATAK can be used effectively in various operational environments, providing real-time data and communication capabilities.

Pilot program for securely patching and prioritizing risk-based vulnerabilities

Ivanti is actively involved in a pilot program aimed at securely patching and prioritizing risk-based vulnerabilities. This program focuses on:

- Risk-based vulnerability management. Ivanti's solutions prioritize vulnerabilities based on risk, ensuring that the most critical issues are addressed first to minimize potential threats.
- Automated patching. Our solutions automate the patching process, reducing the time and effort required to maintain a secure environment.

Collaboration with trusted allies

Ivanti is committed to collaborating with trusted allies to enhance the capabilities of U.S. warfighters. Our solutions are designed to be interoperable with the systems and standards of allied forces, ensuring seamless communication and coordination. We actively engage with industry partners to develop and implement innovative, standards-based solutions that address the unique challenges faced by the DoD and its allies.

Commitment to FedRAMP High and Impact Level 5 Certification

Ivanti has a published commitment to move to FedRAMP High and Impact Level 5 certified platforms, ensuring that our solutions meet the highest standards of security and compliance required by the DoD.

Conclusion

Ivanti is dedicated to supporting the mission of the Department of Defense by providing secure, innovative, and interoperable solutions that enhance the capabilities of U.S. warfighters. Our commitment to security, trust and collaboration ensures that we are well-positioned to support the DoD's vision for modernizing and mobilizing its forces.
