Critical

2

Important

Prepare yourself for some Holiday Cheer because we have a fairly lite lineup of updates to cover this month. Microsoft released fixes for 34 new CVEs including 4 which are Critical. Apple released their updates for iPad, iOS, and macOS on December 11 and Google Chrome is likely releasing an update on Wednesday December 13. The most urgent CVEs all seem to be in the OS and browsers this month so primary focus is to prioritize the OS and browser updates. Happy Holidays and we will see you again in January 2024!
